- CO2 Gas Sensor
- Minimal Size
- Stable Operating
- Very Good Price

EXSEN INC., CERAMICS BASED ELECTRO-CHEMICAL TYPE SENSOR

Gas Sensor Manufacturer

EXSEN

Warm-up

To sense carbon dioxide gas with solid electrolyte sensor, sensor should be heated about 400 Celsius degree. So it takes few minutes to heat sensor.

Temperature of heater core is very high. But the Surface of sensor package is warm ,50~70 Celsius degree.
